Salmon-Safe Certification Request

In further pursuit of our mission to support the practitioners of biologically sound agriculture, Oregon Tilth has teamed up with Salmon-Safe, a nonprofit organization working to restore watersheds so salmon can spawn and thrive. Oregon Tilth is providing fast track Salmon-Safe certification to organic farmers that further protect water quality and biodiversity. OTCO farms located in Pacific salmon watersheds are eligible to benefit from growing market recognition of the Salmon-Safe label. Salmon Safe, Inc. manages its own standards development and provides retail marketing and sales support services for certified growers.

Salmon-Safe Standards may be viewed at www.salmonsafe.org or requested directly from info@salmonsafe.org. The cost of Salmon-Safe certification is minimized for OTCO producers by offering Salmon-Safe assessment during routine organic inspection. Salmon-Safe certification is entirely optional and is independent of organic certification.

Salmon-Safe annual certification fee for OTCO producers has been reduced to \$95.00 for a single farm location plus \$65.00 for each additional non-contiguous site.

Please return this completed form to the Oregon Tilth office.
